Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2016 - December 31, 2016

Filing Confirmation Number: 0007623938

Filing Deadline: March 23, 2017

FRN: 0006945950

Filing Date: 01/17/2017 01:04 PM

General Report Information

Type of Company

Service Provider

De Minimis Exception

Did you offer any handsets to subscribers in the United States during the reporting period? Yes

Have you been offering handsets in the United States for at least three years prior to the end of the reporting period? Yes

Date that you began offering handsets in the United States

Are you a small entity? No

Were you a small entity at any time during the three years prior to the end of the reporting period? No

Date that you ceased to be a small entity?

Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

Yes

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Yes

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: T-Mobile makes information available to consumers about the availability of its current HAC product offerings. T-Mobile's HAC-compliant handset boxes are labeled. In addition, T-Mobile places the HAC M-rating and, where required, T-rating information on its price/feature cards, which are located in T-Mobile owned and operated retail stores. HAC product information is available on the company's public webpage, which is referenced within the Status Report.

T-Mobile embraces opportunities to talk about its HAC offerings, as well as other products, services and innovations designed to promote accessibility, to broad audiences by participating in conferences and seminars attended by organizations representing persons with hearing loss and members of such organizations. As an example, during June 2016, T-Mobile exhibited and participated in the Hearing Loss Association of America's annual national convention in Washington, DC, as well as at the M-Enabling Conference held in Arlington, Virginia. Furthermore, T-Mobile attended the American Foundation for the Blind Leadership Conference in Arlington, Virginia, in March 2016 and participated in an accessibility roundtable at the September 2016 CTIA Show in Las Vegas, Nevada. Furthermore, T-Mobile engages in valuable exchanges regarding consumer related issues with the T-Mobile Accessibility Council. In addition to receiving valuable consumer feedback at these gatherings, in several of the discussions that take place, T-Mobile oftentimes mentions handset and network developments that are designed to

enhance the end-user experience, and continues to stress the importance for consumers to try/test HAC handsets prior to purchase.

Methodology for Functionality Levels

Best/Premium:

Devices featuring higher-end design, material and finish, paired up with a more sophisticated user interface and functionalities. Functionality can include Wi-Fi Calling, LTE and VoLTE calling features. These phones have high-end chipsets allowing for advanced features and applications.

Good:

Phones with straight-forward features, applications and design. Functionality can include Wi-Fi Calling, LTE and VoLTE calling features. These devices have basic chipsets.

Report Remarks

T-Mobile's report includes handset models offered by GoSmart through August 2016. GoSmart customers were transferred to Tracfone Wireless, Inc. on September 1, 2016, in connection with closing an Asset Purchase Agreement. As a result, the handset models offered by GoSmart are no longer subject to reporting by T-Mobile as of September 1, 2016. This does not affect T-Mobile's overall HAC compliance.

The Commission has indicated that service providers are expected to verify handset model-specific HAC information: "from the manufacturer's previous reports to the Commission, from the manufacturer's own website, or from the manufacturer directly." See Amendment of the Commission's Rules Governing Hearing-Aid Compatible Mobile Handset; Petition of the American National Standards Institute; Accredited Standards Committee C63 (EMC) ANSI C63, First Report and Order, 23 FCC Rcd 3406, 3445-56 para 98 (2008) ("2008 Order"). Additionally, the FCC has indicated that service providers should check the FCC's equipment authorization search website. In preparing its HAC Report covering 2016, T-Mobile encountered instances where, for certain handsets, there were differences between the HAC rating or frequency information on the FCC's equipment authorization search website and the information reflected in the confirming documentation T-Mobile received from an OEM/manufacture (upon which T-Mobile is allowed to rely) and/or from the manufacturer's previous reports to the Commission. As part of its due diligence efforts, T-Mobile investigated such discrepancies and where significant has included an explanation in the "Remarks" section for applicable handsets.

You have reported the following handset model summary information.
